

DeepTrak™ – Staggered Wheel Carton Flow

DeepTrak™ Staggered Wheel Carton Flow is a flexible solution designed specifically to accommodate all types of products. When incorporated in a complete system, Staggered Wheel Carton Flow is capable of storing different weights and sizes in the same system.

www.dynamicstorage.com

DSS Pallet Flow Storage Technology is the fastest and most effective system for dynamic warehousing. These systems facilitate the distribution of assorted products. No other warehouse distribution system is easier to manage and provides an ROI in as little as 18 months. Dynamic Storage will help you with your warehousing needs providing customer service and the experience to back up what we do.

Wheel centers and track width depends on:

- Carton Weights
- Carton Size
- Bottom conveying surface and rigidity of the carton
